SAFETY TIPS

Notice :

1. Do not put the projector on your leg or any part of your body to prevent injury from the heat.
2. Do not place any liquid or heavy objects on the projector.
3. Avoid using the projector during weather of high humidity or thunderstorms.
4. Do not disassemble the projector at will. There is a risk of electric shock, which also affects the normal maintenance.

Use :

1. Projector is only suitable for use in non-high temperature environment. Do not block the air intake and heat sink during operation or charging. 
2. Do not look directly at the lens of the projector during use, or you may hurt your eyes.
3. Please use the projector in a darker room or draw the curtain to get better projection effect.
4. Please use the projector carefully. Falling or impacting may damage parts or cause blurred images and abnormal display.

Power supply:

1. Please charge the projector with its own power adapter. Other adapters may cause serious damage to the projector.
2. Careful use of power cord to avoid excessive bending. Damage to the power cord may lead to electric shock and fire.
3. After use, the power adapter should be unplugged from the socket.

Clean :

1. Please disconnect the power supply before cleaning the projector. Wipe the fuselage with a clean cotton wool or soft cloth, and then wipe off the residual moisture with a dry cloth.
2. Neutral detergents may be used, but do not use strong detergents or solvents (such as alcohol or diluents).
3. Lens should be cleaned with soft dust-free cloth, lens cloth or lens paper. Be careful not to scratch the lens.
4. Please use a soft brush regularly to clean the heat sink and speaker parts of the projector, otherwise the heat sink will be blocked by dust, which will cause overheating of the projector and even lead to machine failure.
